

SPARSH GOYAL

Software Backend Developer

+919887102517 sparshgoyal2008.bittu@gmail.com LinkedIn GitHub Portfolio X (Twitter) Jaipur, India

PROFESSIONAL SUMMARY

Aspiring **Software Backend Developer** dedicated to **building modern web applications**, leveraging **data analytics**, and enhancing problem-solving capabilities.

WORK EXPERIENCE

Developer Lead (Core Team) | Full-time

Oct 2025 - Apr 2026

Google Developer Groups (GDG) On Campus – Poornima University

On-site • Jaipur, Rajasthan

- Led technical programs and mentoring sessions on Data Structures & Algorithms, Software Development, and Cloud Technologies for 100+ student developers.
- Conducted 10+ code review and debugging workshops, improving code quality, algorithm efficiency, and software engineering best practices.
- Developed and deployed applications on Google Cloud Platform (GCP), gaining hands-on experience with cloud-native development, deployment pipelines, and scalable backend systems.

Technologies / Skills Used : React, Node.js, Express, MongoDB, Tailwind CSS, Google Cloud Platform

PROJECTS

Likhlo: Your Own Diary | Website

Dec 2025 - Dec 2025

Developer

- Developed a secure personal diary web application.
- Implemented all 4 CRUD functionalities for managing private notes using real-time cloud storage.
- Designed a modern, responsive UI that enhances user experience through colored note tiles and smooth interactions with more than 4 operations.
- Facilitated deployment and integrated PWA support, ensuring seamless access on both mobile and desktop devices.

Technologies / Tools Used : JavaScript, Firebase, Express.js, Express, Node.js, React, vite

Student Result Management System

Developer

- Engineered a full-stack academic management system using **Node.js, JavaScript, SQL, and RESTful APIs**, managing **500+ student records** through complete CRUD functionality.
- Optimized database performance through normalized schema design and indexed queries, improving record retrieval speed by **30%**.
- Developed secure authentication and role-based authorization for **multiple user roles**, ensuring protected access to academic data.
- Created a responsive user interface that enabled faculty to perform result entry, updates, and searches with **40% fewer manual steps**.

Technologies / Tools Used : Node.js, SQL, Express

ZeroTrace – Secure Data Destruction System | Github

Developer

- Engineered a secure data wiping system aligned with **NIST 800-88 standards**, processing and sanitizing **1,000+ files** through automated deletion workflows.
- Implemented **multi-pass overwrite techniques (3-pass/7-pass)** and verification checks, ensuring **99%+ wipe validation** during testing.
- Developed scalable sanitization modules capable of handling **GB-scale datasets**, enhancing reliability and compliance for secure data disposal.
- Integrated audit logging and reporting features, enabling **real-time tracking of deletion events** and supporting regulatory compliance requirements.

Technologies / Tools Used : Flutter, MongoDB, Git, Railway, Vercel

SKILLS

Databases :	PostgreSQL, MySQL, Firebase
Frameworks & Libraries :	Node.js, Express, React
Programming Languages :	C++, JavaScript, SQL, Python
Soft Skills :	Adaptability, Problem Solving
Tools & Platforms :	Power-BI, Tableau, EXCEL, GitHub, Git, Postman

EDUCATIONS

Poornima University | Jaipur

Aug 2024 - Present

B.Tech in Computer Science & Engineering

CGPA : 8.9

- B.Tech in Computer Science & Engineering** from **Poornima University**
