

SPARSH GOYAL

Backend Developer | Node.js • Express.js • PostgreSQL • REST APIs

☎ +919887102517 ✉ sparshgoyal2008.bittu@gmail.com 🔗 LinkedIn 🐙 GitHub 📁 Portfolio 📍 Jaipur, India

PROFESSIONAL SUMMARY

Software Backend Developer skilled in Node.js, Express.js, SQL, PostgreSQL, and RESTful API development. Experienced in building full-stack applications, implementing authentication systems, optimizing database performance, and deploying scalable web solutions. Passionate about backend engineering and problem-solving.

WORK EXPERIENCE

Developer Lead (Core Team)

Oct 2025 - Apr 2026

Google Developer Groups (GDG) On Campus – Poornima University

On-site • Jaipur, Rajasthan

- Mentored 300+ student developers through technical programs on Data Structures & Algorithms, Software Development, and Cloud Technologies.
- Led 10+ code review and debugging workshops, improving code quality, algorithm efficiency, and software engineering best practices.
- Built and deployed 3+ applications on GCP, gaining hands-on experience in cloud-native architectures, CI/CD pipelines, and scalable backend systems.

Tech Stack : React, Node.js, MongoDB, Tailwind CSS, Google Cloud Platform, Express.js

PROJECTS

Likhlo: Your Own Diary | 🌐 Website 🐙 Github

Dec 2025 - Present

- Built a Progressive Web Application (PWA) using React, Node.js, and Firebase Firestore, enabling secure note management with full CRUD functionality.
- Implemented complete CRUD operations for secure creation, retrieval, updating, and deletion of personal notes using Firebase Firestore.
- Designed a modern, responsive UI that enhances user experience through colored note tiles and smooth interactions with more than 4 operations.
- Deployed the application using Vercel and Firebase Hosting with PWA support, enabling reliable cross-platform access and offline functionality across desktop and mobile devices.

Tech Stack : JavaScript, Firebase, Express.js, Node.js, vite, React.js

Student Result Management System | 🐙 Github

- Engineered a full-stack academic management system using **Node.js, JavaScript, SQL, and RESTful APIs**, managing **500+ student records** through complete CRUD functionality.
- Optimized database performance through normalized schema design, indexed SQL queries, and efficient REST API architecture, improving record retrieval speed by 30%.
- Developed secure authentication and role-based authorization for **multiple user roles**, ensuring protected access to academic data.
- Created a responsive user interface that enabled faculty to perform result entry, updates, and searches with **40% fewer manual steps**.

Tech Stack : Node.js, SQL, Express.js

ZeroTrace – Secure Data Destruction System | 🐙 Github 🌐 Website

- Engineered a secure data wiping system aligned with **NIST 800-88 standards**, processing and sanitizing **1,000+ files** through automated deletion workflows.
- Implemented **multi-pass overwrite techniques (3-pass/7-pass)** and verification checks, ensuring **99%+ wipe validation** during testing.
- Developed scalable sanitization modules capable of handling **GB-scale datasets**, enhancing reliability and compliance for secure data disposal.
- Integrated audit logging and reporting features, enabling **real-time tracking of deletion events** and supporting regulatory compliance requirements.

Tech Stack : Flutter, MongoDB, Git, Railway, Vercel, Dart

TECHNICAL SKILLS

Programming Languages :	C++, JavaScript, SQL, Python
Backend :	Node.js, Express.js, REST APIs, JWT Authentication, Authorization, MongoDB
Frontend :	React.js, HTML5, CSS3, Tailwind CSS
Databases :	PostgreSQL, MySQL, MongoDB, Firebase
Cloud and DevOps :	Google Cloud Platform, Vercel, Railway, Git, GitHub
Tools :	Postman, Power BI, Tableau, Excel

EDUCATIONS

Poornima University | Jaipur

2024 - 2028

B.Tech in Computer Science & Engineering

CGPA : 8.9/10

- Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming
